

HEVC VOICE DIGITAL TERRESTRIAL DECODER

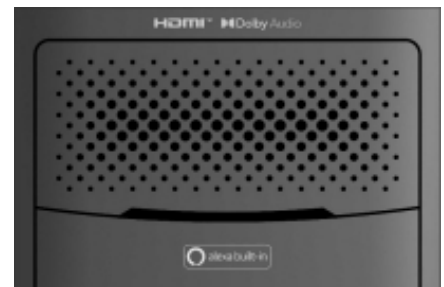

“Alexa, switch to Discovery channel”

Simple and easy to install, Rio T2 VOICE is the first digital terrestrial decoder from latest generation DVB-T2 HEVC 10-bit with integrated Amazon Alexa voice commands. Thanks to the integrated WIFI and Bluetooth functions, the change of channels, volume and Alexa functions can also be done vocally with the microphone in the remote control

The remote control of the Rio T2 VOICE is a latest generation remote control equipped with infrared sensors, a microphone and Bluetooth. Pressing the Alexa button will ask Alexa to listen, and command all functions such as zapping channels, choose a channel, search in the 7 days Electronic guide, listen to your favorite playlist on AmazonMusic, info on Wikipedia, cooking recipes, and thousands of features of the Amazon's Alexa voice world!
